4. Click on the 'HandBrake' pane and then on the 'Preferences'. Make sure that the default setting is set to MP4. It should look like the box on the right.

5. Click on the 'Window' pane and then 'Picture Settings' to adjust the picture format.

If there is some need to adjust the picture, use the up and down arrows to do so and get the wanted **1920 x 1080** size. This goes for the cropping of the picture as well.

(If the film has black bars on top and bottom or on the sides, change the cropping setting to custom and adjust it so the bars are included and the size is 1920 x 1080.)

7. Your AUDIO SETTINGS must look like in the following picture.

- 1. Samplerate: 48
- 2. Bitrate: 160

8. SUBTITLES

If your film has subtitles which are NOT hardcoded subtitles on your file/DVD, make sure that you click on the Subtitle pane and choose the correct subtitles.

8.

9. When all of the settings look like they do in the screenshots above, press the green START button and the encoding will begin.

Handbrake will inform you, when the encoding is done.

GOOD LUCK!
